

KEG stainless steel individual urinal

Reference: **UR-30**

Description

KEG stainless steel individual urinal with integrated automatic rinsing and infrared sensor.

Beer keg design for bars, nightclubs, vintage style.

Designed for heavy use and vandal resistance.

Features

AISI 304 stainless steel brushed finish.

Back mounting on stainless steel plate with special screws.

Integrated infrared sensor for automatic flushing.

Adjustable settings through SLD03 remote control (flush time, sensor range, on/off...).

The system reacts to the presence of the user in front of the urinal from a max. distance of 0.7 m, and a min. presence time in the active zone of 7.5 s.

The system triggers the flush after the user leaves the active zone.

Adjustable 0.5 to 15.5 second rinsing time.

Automatic hygienic rinse after 24H of non-use.

Powered by 6V batteries or 230/12V external transformer.

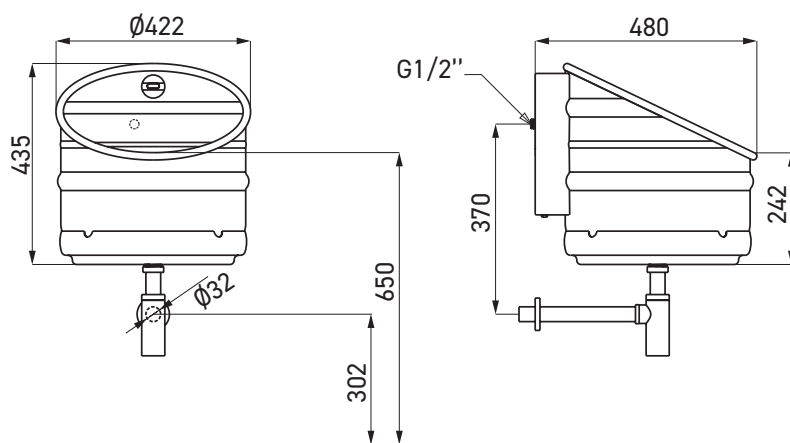

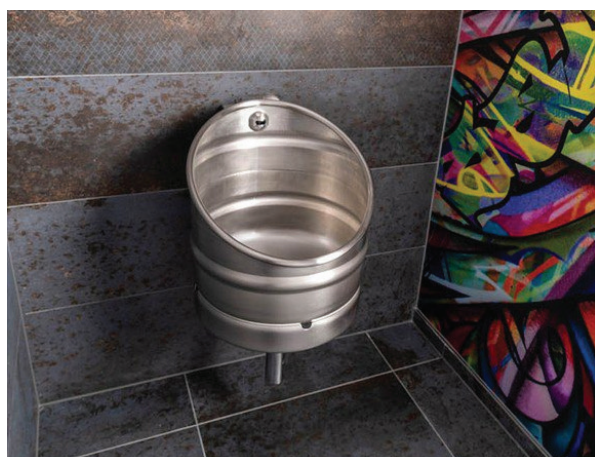

M1/2" water inlet / Ø32 mm drain.

Water pressure: 1 - 6 bars. Flow rate: 12LPM at 3 bars.

Dim.: W422 x D480 x H435 mm.

CE. 5 year electronic warranty.

Urinal supplied with rinsing nozzle with IR sensor, solenoid valve, angle stop valve with filter, hoses, trap, fixings. Transformer not supplied.
