

Wall-mounted automatic stainless steel foam soap dispenser

Reference: **DS-21**

Description

Wall-mounted automatic foam soap dispenser in stainless steel and ABS plastic.

Dispenses soft, voluminous, and abundant foam.

No leakage: pump specially designed to prevent any malfunction or leakage risk and to keep the sink area clean.

Long-life pump: usable over 200,000 times.

Easy to refill and maintain.

The LED indicator shows the dispenser's status, for example, it flashes when the batteries are low.

All components are independent for easy maintenance, the dispensing mechanism is separated from the tank, preventing damage from soap.
