

Landing door coin operated lock

Reference: **SP-15**

Description

Mechanical coin lock (0.20, 0.50, 1 or 2€) or token-operated, for access control to toilets, showers, etc.

Specifically designed for landing doors, without internal locking. The door can only be opened by inserting a coin.

3 operating modes: paid access (coin or token) / free access / locked access.

Unlocking only with a token or a single coin of a predetermined value between 0.20 and 2 Euros.

Paid access can be set up for external users, while tokens (e.g., the same size as a €0.50 coin) can be distributed to customers or staff.

For automatic door closing, it is recommended to use hydraulic door closers.

Vandal-proof.

Features

Metal housing in anthracite or ivory white finish.

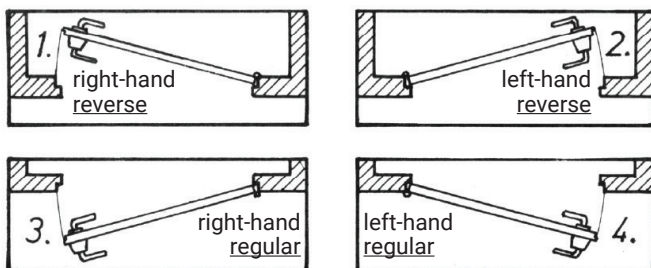

Cashbox capacity: 400 coins

Easy installation on doors from 34 to 45 mm thick.

Mortise lock with 60 mm center distance.

Dimensions: H375 x W80 x D70 mm.
