

TRIMEO automatic soap dispenser

Reference: **RES-781**

Description

Touch-free electronic soap dispenser with top-fill system and LED level indicator, designed to reduce service costs in high-traffic areas.

When the soap tank is full, a green LED lights up on the level indicator at the base of the dispenser.

When the indicator turns red, it's time to refill the tank, no need to open a door to check the soap level.

Combined with a touch-free electronic faucet, it creates a hygienic, fully automated, and aesthetic environment.

A practical and cost-effective solution for high-end washrooms and high-use public facilities.

Features

Activated by infrared sensor.

Powered by 230/12V transformer.
