

## Mirror with stainless steel frame and shelf

Reference: **B-292 1836**

### Description

High-quality mirror with shelf, secured by a one-piece stainless steel frame with welded corners and theft-resistant mounting system, for sanitary areas and bathrooms in communal facilities.

Quick-lock design: thick steel wall bracket fixed by snap fittings, on which the mirror engages at the top and bottom to be held against the wall.

This device can be unlocked by inserting two flat-blade screwdrivers behind each side of the mirror near the bottom or under the bottom of the mirror and pulling the bottom of the mirror forward then upward.

Allow a minimum clearance of 25 mm above the top of the mirror frame and a minimum space of 12.7 mm on each side.

### Features

6 mm float glass mirror of excellent quality, guaranteed for 15 years against any deterioration of the silver coating.

Frame with welded corners 19 x 19 mm in AISI 304 stainless steel 18/10 satin finish.

Beveled inner edge to hold the frame firmly against the mirror.

Rounded edges.

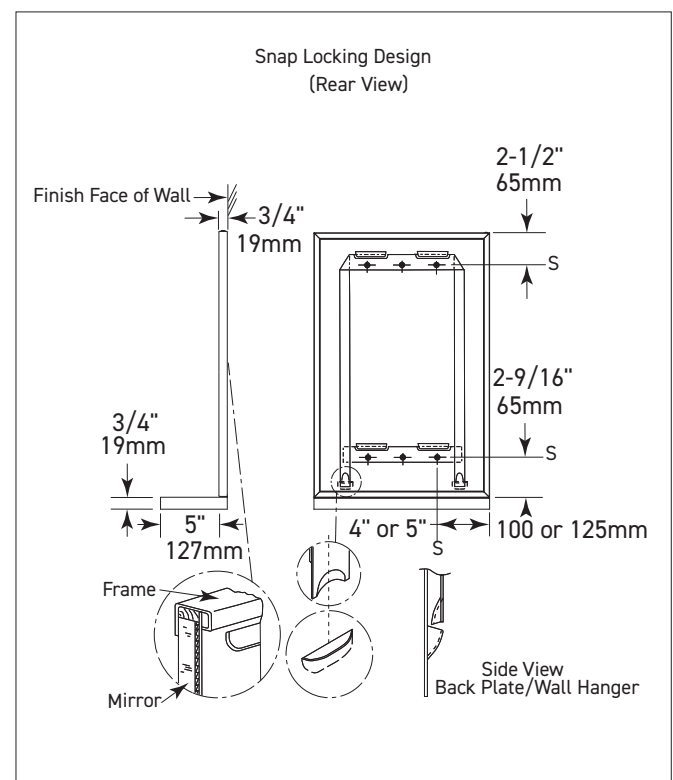

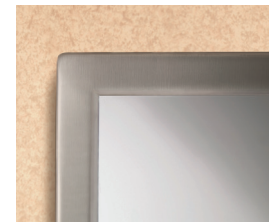

Welded shelf with invisible fixing, in 1.2 mm thick brushed stainless steel, with welded corners and rolled lower edge for increased rigidity and safety.

Continuous 5 mm thick polyethylene shim between the frame and the mirror to absorb impacts, rot-proof.

Back of the mirror in galvanized steel.

Dimensions: W460 x D19 x H910 mm.

Shelf: W460 x D127 x H19 mm.
