

Tilted mirror for PRM with welded stainless steel frame

Reference: **BO-293**

Description

Fixed tilted mirror in float glass with stainless steel frame welded corners for people with reduced mobility (PRM) in accessible spaces for all, with an angle that facilitates the view for wheelchair users or short stature individuals.

Features

6 mm float glass mirror of excellent quality, guaranteed for 15 years against any deterioration of the silver coating.

19 x 19 mm frame in AISI 304 stainless steel with satin finish, made in one piece with welded corners.

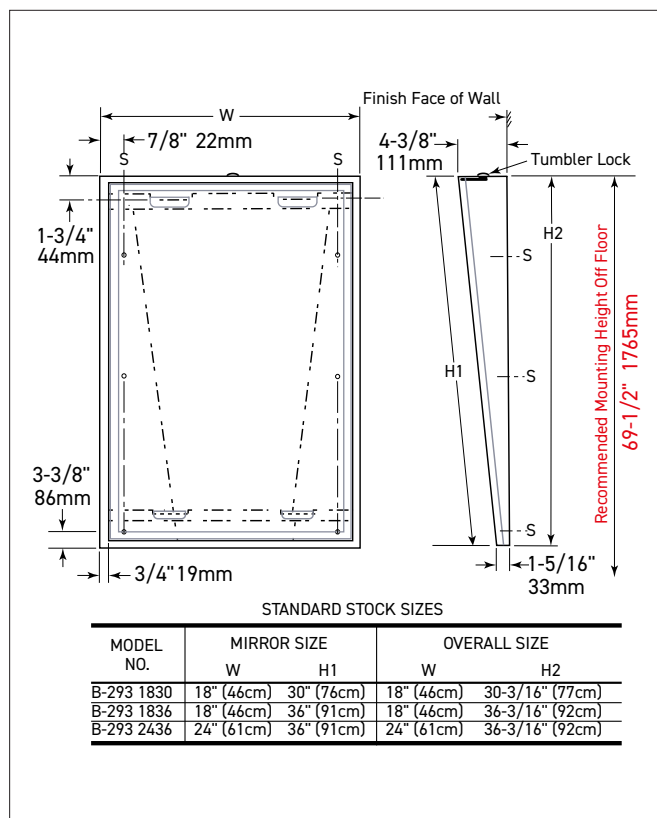

Beveled edges of the frame for perfect mirror hold, without any gap, providing better aesthetics and safety during cleaning.

From the wall, projection 111 mm at the top and 33 mm at the bottom.

Continuous protection by plastic shim between the frame and the mirror, and 3 mm rot-proof polystyrene shim between the mirror and galvanized steel back to absorb shocks.

Invisible wall mounting, with key locking at the top.

Allow a minimum clearance of 25 mm above the top of the mirror frame and a minimum space of 12.7 mm on each side.
