

PRM mirror with tilting stainless steel frame

Reference: **B0-294**

Description

High-quality mirror with stainless steel frame, easily tiltable forward ensuring full visibility for wheelchair users or return to vertical position.

The tiltable stainless steel framed mirror suitable for people with reduced mobility ensures functionality and accessibility for all users, as well as durability and ease of maintenance, which is essential in a high-use environment such as communal facilities.

Features

Mirror made of 6 mm float glass of excellent quality, guaranteed for 15 years against any deterioration of the silver layer.

Frame with welded 19 x 19 mm corners in AISI 304 18/10 stainless steel with satin finish. The beveled edges of the frame fit the mirror, allowing a gap-free adjustment for better appearance and greater safety during mirror cleaning.

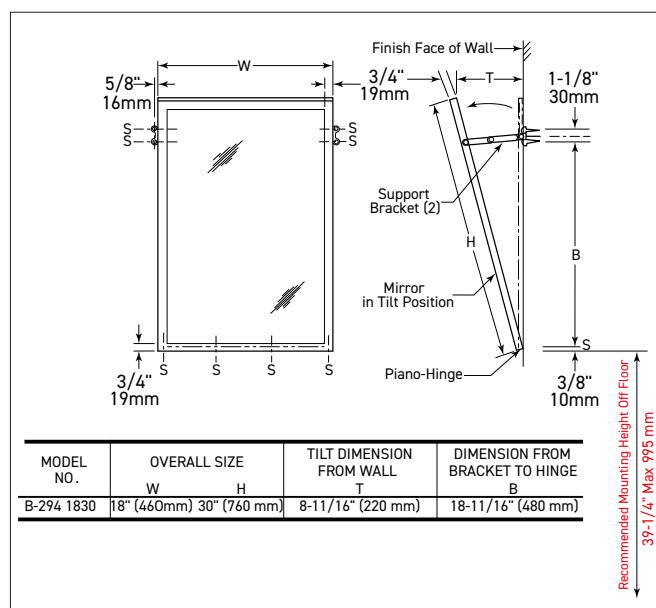

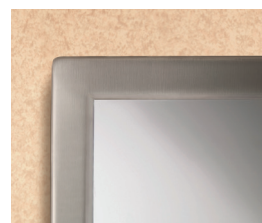

Continuous 5 mm thick polyethylene plastic shim between the frame and the mirror to absorb shocks, rot-proof.

Mirror back in galvanized steel.

Stainless steel piano hinge welded across the entire width at the bottom of the frame.

Self-locking stays, securely riveted to the frame, hold the mirror flush with the wall or in an inclined position.

Dimensions: W460 x D19 x H760 mm.
