

Extra-flat trap with Clic Clac basin drain or free-flow drain brushed nickel PVD finish

Reference: **BS-36-S2**

Description

Extra-flat trap with drain in brushed nickel PVD finish (stainless steel effect), including a compact H70 mm trap and a 1 1/4" Click-Clac drain (open/close by finger pressure), convertible to free-flow with fixed dome.

This washbasin waste fitting system consists of the shortest trap achievable in accordance with standard UNI EN 274, combined with the waste drain fixed directly to the trap by an internal screw, with no additional accessories.

Saves space under the washbasin, thanks to all components being contained within a single unit, and facilitates PMR access under washbasins.

Features

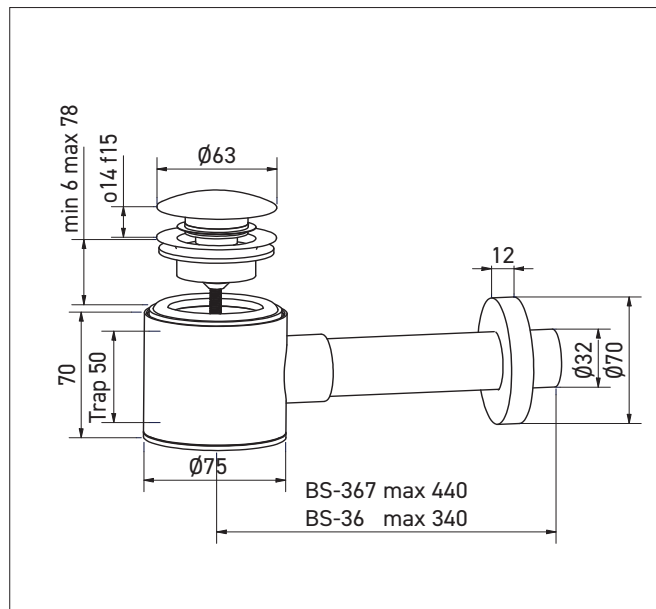

Brushed nickel PVD brass trap and drain for 1 1/4" waste fitting.

Trap body Ø 75 x H70 mm.

Bottom-opening for cleaning.

Includes horizontal Ø 32 waste pipe L340 or 440 mm, and rosette Ø 70 mm.

For basins with a maximum thickness of 78 mm.
