

Automatic wall-mounted soap dispenser

Reference: **DS-04**

Description

White automatic wall-mounted liquid soap dispenser for commercial, professional, or residential restrooms. With its elegant and durable design, it is also energy-efficient and easy to maintain.

Available in cartridge or refillable format to help reduce waste.

Long lifespan up to 145,000 cycles for the batteries and 200,000 cycles for the soap pump.

The smart LED indicator blinks to indicate the dispenser's status, such as low battery.

When fitted with a silicone nozzle resistant to alcohol (available on request), it can also be used in kitchens as a dish soap dispenser or as a disinfectant dispenser to help stop the spread of germs.

Features

White ABS plastic dispenser.

Self-adjusting infrared sensor, 75 ± 15 mm (adjustable).

Compatible with alcohol or disinfectant liquids (viscosity 1–3000 mPs).

Capacity: 500 ml. Refillable.

Dosage: 0.8–1.1 ml.

Powered by 3 LR14 batteries (not included).

Autonomy: up to 145,000 uses or 1 year.

Automatically activates when the lid is closed and deactivates when opened.

Key lock on the top of the unit.

Independent components for easy maintenance.

The mechanism and tank are 100% separate, preventing soap from damaging the mechanism.

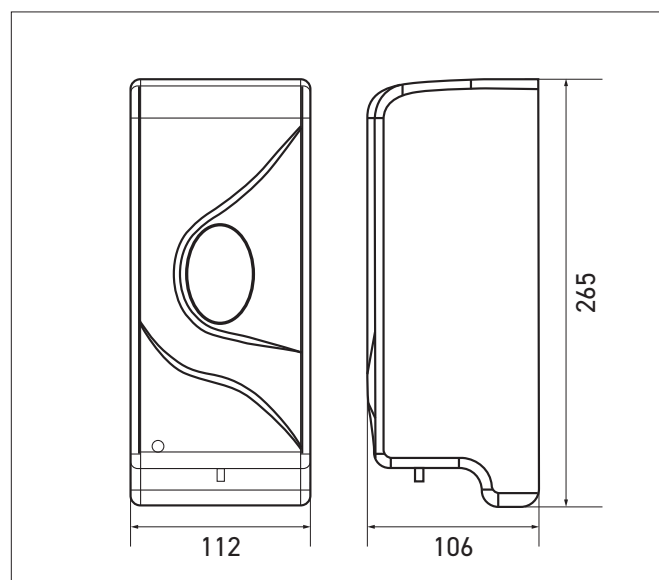

For proper sensor function, allow 200 mm of free space below the dispenser (300 mm if mounted beneath stainless steel).

Mounting with screws and wall plugs or included double-sided adhesive.

Dimensions: W112 x D106 x H265 mm.

CE, EMC, and ROHS certified.

2 year warranty.
