

Wall-mounted automatic matte black soap dispenser

References: **DS-08-N / DS-08-N-T**

Description

Wall-mounted stainless steel liquid soap dispenser, matte black finish, for heavy-duty use in communal areas.

Elegant and durable design for frequent use.

Long lifespan 145,000 cycles for the batteries and 200,000 cycles for the soap pump.

Touch-free operation improves hygiene and helps save soap through controlled dispensing.

Available in cartridge or refillable format to reduce waste.

The smart LED indicator blinks to show the dispenser's status, such as when the batteries are low.

When fitted with an alcohol-resistant silicone nozzle (available on request), it can also be used in kitchens as a dish soap dispenser or as a disinfectant dispenser to help stop the spread of germs.

Features

AISI 304 stainless steel soap dispenser, matte black finish.

Self-adjusting infrared sensor, 75±15 mm adjustable.

Capacity 800 ml.

For liquid soap or hydro-alcoholic gel (viscosity 2000-5000 cps).

Touch-free dosage: 1 - 1.5 ml

Powered by 3 LR14 batteries (not included) or 230/4.5V transformer (with 1.90 m cable).

Battery life of 145,000 uses or 1 year.

Automatically activates when the lid is closed and deactivates when opened.

Key lock on the top of the unit.

Independent components for easy maintenance.

The mechanism and tank are 100% separate, preventing soap from damaging the mechanism.

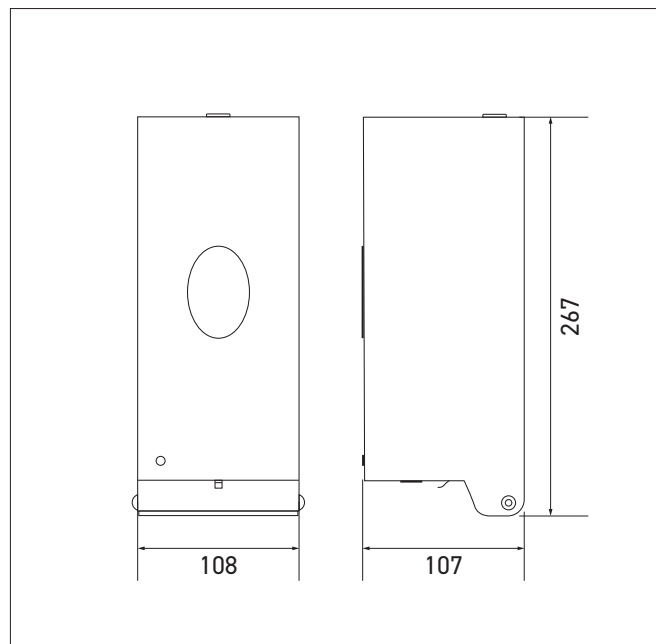

For proper sensor function, allow 200 mm of free space below the dispenser (300 mm if mounted beneath stainless steel).

Mounting with screws and wall plugs or included double-sided adhesive.

Dimensions: W108 x D107 x H267 mm.

CE, EMC and ROHS certified.

2-year warranty.
