

Wall-mounted automatic stainless steel soap dispenser

References: **DS-08 / DS-08-T**

Description

Wall-mounted stainless steel liquid soap dispenser for heavy-duty use in communal areas.

Touch-free, it improves hygiene and saves soap with controlled dispensing.

Long service life 145,000 cycles for the batteries and 200,000 cycles for the soap pump.

Cartridge-based or refillable to minimize waste.

The smart LED indicator flashes to show the status of the soap dispenser, for example when the batteries are low.

By using a silicone pump tube with an alcohol-resistant tip (available upon request), it can also be used in the kitchen as a dishwashing detergent dispenser or as a sanitizer dispenser to help prevent the spread of germs.

Features

AISI 304 stainless steel soap dispenser, brushed finish.

Self-adjusting infrared sensor, 75±15 mm adjustable.

Capacity 800 ml.

For liquid soap or hydro-alcoholic gel (viscosity 2000-5000 cps).

Dosing: 1 - 1.5 ml touch-free.

Powered by 3 LR14 batteries (extra charge) or 230/4.5V transformer (with 1.90 m cable).

Battery life of 145,000 uses or 1 year.

Automatically switches on when cover is shut / switches off when cover is opened.

Key lock on top.

Independent components for easy maintenance.

Since the mechanism and the tank of the dispenser are 100% separated, the mechanism cannot be damaged by the soap.

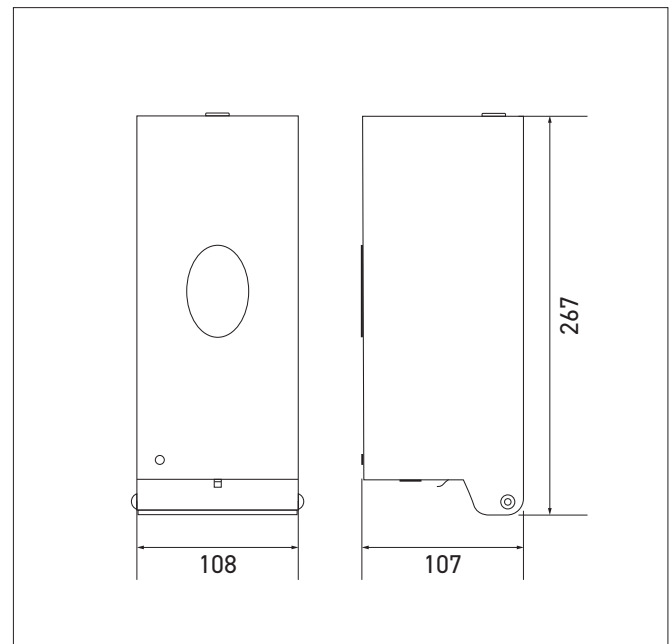

For proper detection, allow a clearance of 200 mm below the dispenser (300 mm when above stainless steel).

Mounting with screws and plugs or double-sided adhesive provided.

Dimensions: W108 x D107 x H267 mm.

CE, EMC and ROHS certified.

2-year warranty.
