

Automatic stainless steel liquid soap dispenser

References: **DS-09-S / DS-09-B**

Description

Automatic wall-mounted liquid soap dispenser in stainless steel, refillable directly or via soap cartridge.

Touch-free, it improves hygiene and saves soap with controlled dispensing.

The LED indicator shows the status of the soap dispenser, for example, it blinks when the batteries are low.

Independent components for easy maintenance.

Since the mechanism and the dispenser's reservoir are 100% separate, the mechanism cannot be damaged by soap.

By using a nozzle with an alcohol-resistant silicone tip (available on request), it can also be used in the kitchen as a dish detergent dispenser or as a sanitizer dispenser to help stop the spread of germs.

Features

AISI 304 quality stainless steel liquid soap dispenser, 1 mm thick, brushed or polished finish, and flame-retardant ABS plastic.

Self-adjusting infrared detection (75±15 mm by default).

Capacity: 800 ml.

Liquid soap (viscosity 2000-5000 cPs).

Dosage: 1-1.5 ml.

Powered by 4 LR06 AA batteries.

Battery life: 40000 uses or 1 year.

Automatically activates when the lid is closed and deactivates when opened.

Key lock on the top of the unit.

Light indicator: LED blinks 3 times = ON

LED blinks blue continuously = low batteries

For proper sensor function, allow 200 mm of free space below the dispenser (300 mm if mounted beneath stainless steel).

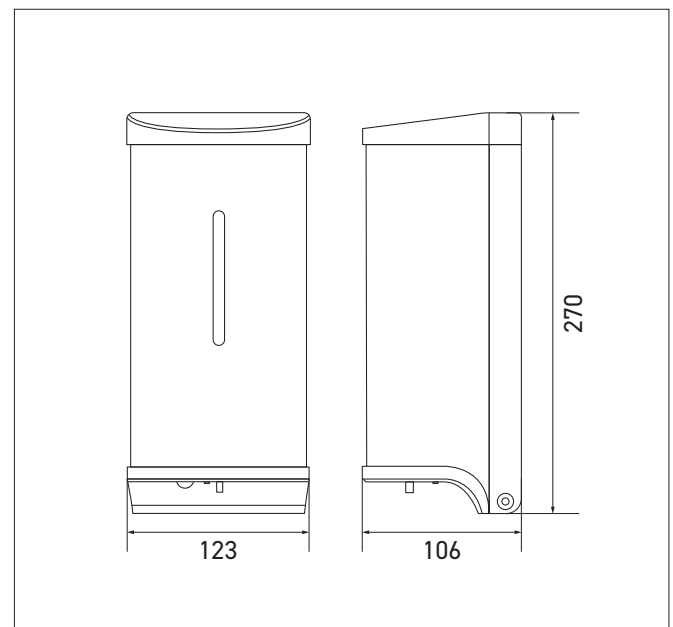

Mounting with screws and wall plugs or included double-sided adhesive.

Dimensions: W123 x D106 x H270 mm.

CE certified. 2-year warranty.
