

Automatic stainless steel disinfectant spray dispenser

References: **DS-10RS** / **DS-10RS-T**

Description

Wall-mounted touchless spray dispenser for disinfectant liquid, in stainless steel, suitable for hands, toilet seats, etc.

All components are independent for easy maintenance.

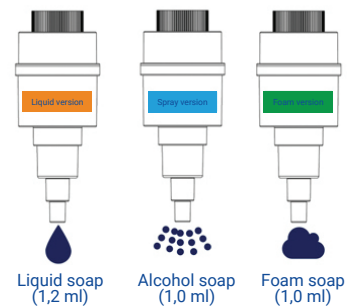

The dispensing mechanism and liquid reservoir are 100% separate, preventing damage to the mechanism from the disinfectant.

The pump is specially designed to prevent any malfunction or leakage risk.

Easy to refill.

One dispenser Three functions

Multi-function = interchangeable pumps
