

Large capacity stainless steel wall mounted automatic soap or gel dispenser

Reference: DS-28

Description

Wall-mounted stainless steel electronic dispenser for soap or hand sanitizer with a high-capacity tank holding up to 2 liters, designed to minimize refills and reduce maintenance costs.

Touch-free, protects from risks of cross contamination.

Powered by a transformer, the dispenser is ideal for use in high-traffic areas such as airports, hospitals, supermarkets, shopping centres and other public places.

Maximum savings: the automatic dispenser activates automatically when the user's hands enter the sensor field, dispensing a precise amount of soap or disinfectant gel.

Easy to install and refill.

Features

Self-adjusting infrared sensor.

Settings by remote control (dosing, soap priming, temporary stop, return to factory settings).

Powered by 230/12V transformer.

AISI 316 brushed stainless steel cover, 1 mm thick.

Level slot.

Key lock.

2L plastic tank.

Liquid soap or hydro-alcoholic gel viscosity up to 3800 cPs). Compatible with ethanol, isopropyl alcohol IPA (up to 80%) and any disinfectant gel containing at least 60% alcohol.

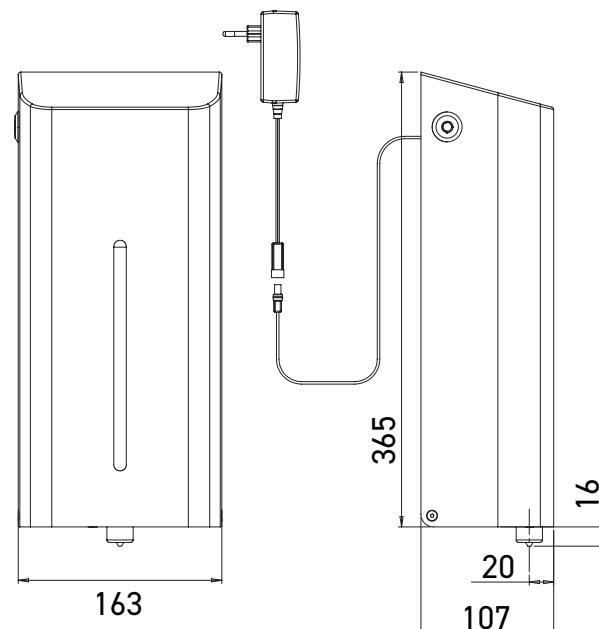

Dosage 0.7 to 0.9 cc depending on soap viscosity (adjustable by remote control).

When refilling, soap dispensing is initiated by remote control or an easy-to-use button.

Wall-mounted.

Dimensions: W163 x D107 x H365 mm

CE. 2 year warranty.
