

Concentrated foam soap

Reference: **HY-9121**

100 ml refill
for 4L of foam soap

4L dilution tank accessory

To be poured and topped up
with water

Description

Concentrated Ecolabel foam soap – Sustainable and efficient solution

Thanks to its reusable and 100% recyclable aluminum refills, this solution eliminates 100% of plastic waste associated with traditional packaging.

1 x 5 L container = 250 g of plastic saved.

An alternative designed to reduce CO² emissions, eliminate water transport and remove single-use plastics.

Optimized packaging & logistics

100 ml aluminum refills.

4 doses of 100 ml packed in a cardboard box. Total weight: 560 g. Equivalent: 16 L of ready-to-use foam soap.

10 boxes packed in a 5.63 kg carton. Equivalent: 160 L of soap.

Less volume, less weight, less transport.

Performance & hand care

Refill for hand foam soap, producing a light, effective and gentle foam.

Suitable for sensitive skin, moisturizing thanks to glycerin. Leaves skin delicately scented, easily removes dirt.

Quick rinsing, water savings up to 50%.

Responsible formula

Vegan formula. Ingredients of natural origin. Certified Nordic Swan. Biodegradable. 0% Paraben, 0% Phenoxyethanol, 0% Phthalates.

Concentrated refill – on-site preparation: 1 x 100 ml refill = 4 L of ready-to-use foam soap.

Simple water addition, direct on-site preparation with only one accessory needed: the ergonomic 4 L reusable container.

Ideal refill method = dilution carried out directly in the container. An effervescent agent ensures homogeneous mixing.

Refill facilitated by the handle, optimized weight, minimal handling.

Competitive price	Controlled storage & dosing	Dissolution in 30 seconds	Optimized ergonomics	Reduction in carbone emissions	Optimized transport	Zero single-use plastics	100 % biodegradable
