

Automatic foam dispenser integrated behind a mirror

Description

Electronic foam soap dispenser with infrared sensor to integrate above a sink.

- Mains operated, by transformer 230/12V.
- Heavy duty manufacture in brass allows an installation in heavy traffic locations. Stainless steel support.
- Drastic soap consumption reduction.
- Touch-free, protects the users against cross contamination.
- Peristaltic pump: there is no direct contact between the pump mechanism and the soap, preventing contamination and backflow.
- Precise and regular soap dose.
- Can be used with non-proprietary soap to reduce costs.
- Soap and air dose to increase the foam effect adjustable by remote control.
- Easy to install and refill.
- Matching design with the vertical infrared sensor tap.
- 2 year warranty.
