

ONE electronic raised mixer tap

References: **RES-53-R / RES-54-R**

Description

Electronic washbasin faucet with infrared sensor, combining geometric minimalism and functionality, with raised spout for countertop basin and remote mixer button.

Pure design: sensor concealed directly in the tip of the spout with reactive detection, water flows as soon as the user's hands are in range!

Its sleek line adds a modern and refined style to sanitary spaces.

The faucet is engineered for easy installation and upkeep.

Features

Self-adjusting infrared detection. Settings adjustable by remote control (sensor range, flow duration, periodic flush, temporary stop...).

Powered by 9V battery or 230/9V transformer.

IP67 dual power input box, when powered by transformer: a built-in back-up lithium battery in the solenoid valve ensures uninterrupted operation in the event of a power outage (not included).

Low battery indicator light for replacement.

Security stop after 90 seconds of uninterrupted use.

Periodic hygiene rinse.

Chromed brass spout \varnothing 25 mm.

Mixer button for temperature adjustment.

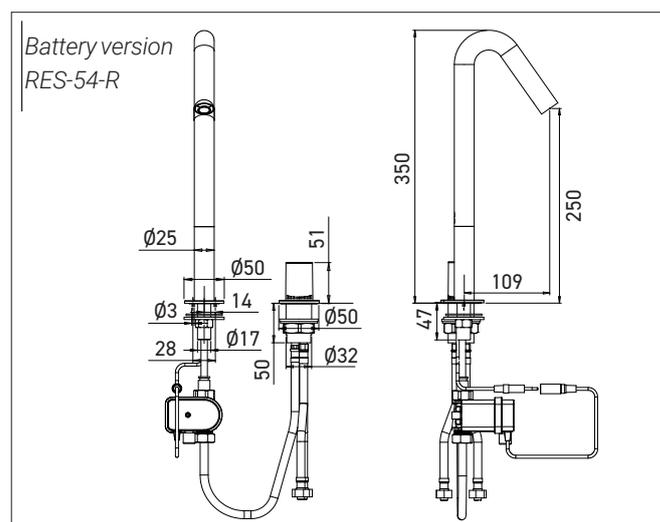

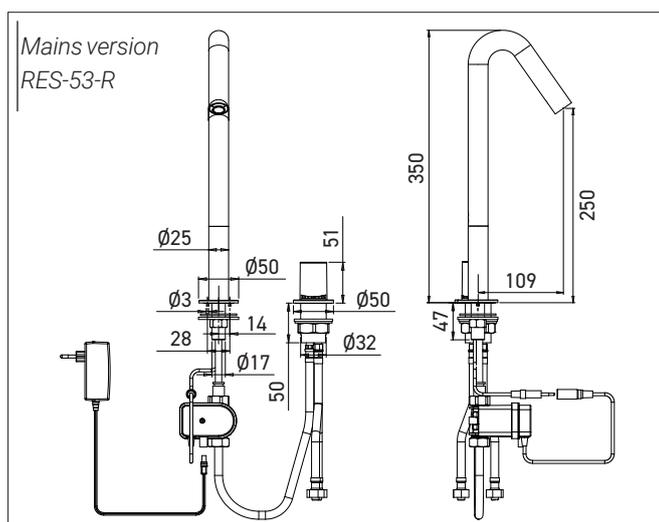

Flow limited to 4 LPM (1.9 LPM on demand).

External M1/2" solenoid valve.

Cold and hot water supply with stainless steel PEX F3/8" hoses with integrated check valves and filters.

Water pressure: 0.3 – 8.0 bars / Maximum temperature 70°C.

CE. ACS. 3-year warranty.
