

Non-proprietary soap tank adapter cap kit

Reference: **RES-797**

1 Pack contents

2 Installation

- 1** Position the adaptor in the opening of the non-proprietary soap tank (of the right viscosity).

- 2** Insert the pipe into the adaptor, slanted end pointing downwards.

- 3** Attach the quick connector to the pipe. Cut the flexible tube to the minimum length and insert it into the connector.

Pipe and adaptor to be transferred to a new tank when it is to be replaced (simple and quick without screwing).

3 Ref. RES-797B option: supply for 3 soap dispensers
