

## Soap tank adapter cap kit

References: **RES-797** / **RES-797G**

### Description

The flexible cap kit allows for direct connection between a soap dispenser and the soap tank of your choice, such as a standard 5L commercial container, without transferring the soap and with increased capacity.

Also compatible with proprietary soap tanks if bound by supplier agreements, allowing you to benefit from the convenience, comfort, and durability of SUPRATECH touch-free soap dispensers.

Optional multi quick-connect fitting to supply 2 or 3 dispensers from the same tank (max 3 m for mains powered soap dispensers).

### Features

Select the cap size that fits the tank (with appropriate viscosity) and place over the neck.

Insert the rigid tube into the tank through the central hole of the cap, and use the quick-connect fitting to easily attach it to the soap hose that feeds the dispenser pump.

Flexible cap: small  $\varnothing$  30–38 mm or large  $\varnothing$  45–59 mm.

Beveled rigid tube to draw soap from the bottom of the tank.

Quick-connect fitting (simply push the hose in; press the blue ring to release).

Pipe cutter to trim the soap hose to the minimum required length.

Small: 30 - 38 mm

Large: 45 - 59 mm

### Pack contents

x 1 flexible cap

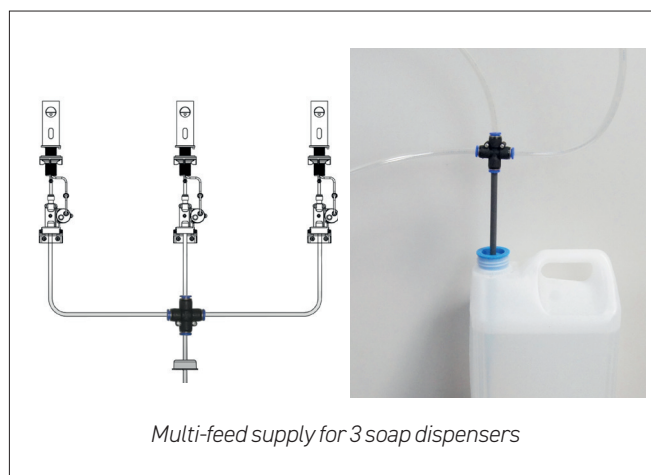

x 1 quick connector

x 1 pipe cutter

x 1 tube rigide

Multi-feed supply for 3 soap dispensers
