

Electronic temporized tap TOUCH

Description

Deck mounted electronic temporized tap with sensor, for cold or pre-mixed water.

Minimalist and refined design for a modern and refined style. Robust conception for an installation in high traffic areas.

Easy installation and maintenance.

- Easy activation by simple touch above the tap
Temporization pre-set to 8 seconds (adjustable from 1 to 60 seconds on site).
- Functionality «START-STOP»: the water flow can be stopped with a simple touch before the automatic shut-off.
- Saves on water and reduces maintenance costs.
- Precise and regular water pressure.
- Inviolable concealed mechanism.
- Sensor features a low battery level indicator by a flashing LED behind the Piezo area.

The electronic temporized tap conserves water, saves on energy and optimizes sanitary hygiene.

Ordering information

TOUCH electronic tap

- RTS-5** 9V battery
- RTS-6** 9V transformer

Options:

- Stainless steel brushed finish
- 24 hours hygiene rinse
- IP-67 transformer to supply up to 3 taps Ref. RES-291
- TOUCH Blue with LED colored rings

Technical characteristics

- Operation: Electronic by contact, using the proven Piezo technology.
- Materials: Chromed brass.
- Water: Cold or pre-mixed.
- Temperature: Maximum 70°C.
- Pressure: 0.5 – 8.0 bars.
- Voltage: 9 Volts CC by 6 x 1,5V AA batteries or 230/9V transformer.
- Autonomy: + than 500 000 cycles (battery version).
- Temporization: 8 seconds pre-set.
- Temporization adjustment 0-60 seconds.
- Warranty: 2 years.
